

Atlas is an innovative FinTech company, designing technology-driven solutions addressing macro, geopolitical and climate risks. Leveraging FinTech, AI, and Climate Tech, Atlas aims to create a globally accessible flatcoin – the Atlas ACT Token – underpinned by an index trading tangible, safe haven assets. The Atlas Index powers an investment strategy that is designed to deliver inflation protection and monetary stability, whilst investing in long term socio-economic and environmental prosperity. Atlas enables wealth preservation, global financial inclusion, and the deployment of capital into resilient communities for all.

## Overview

Pegged to a carefully chosen portfolio of liquid real-world assets – climate-resilient REITs, agricultural commodities, inflation-hedged bonds, and gold – The Atlas Capital Token is a democratized modern investment solution for users worldwide.

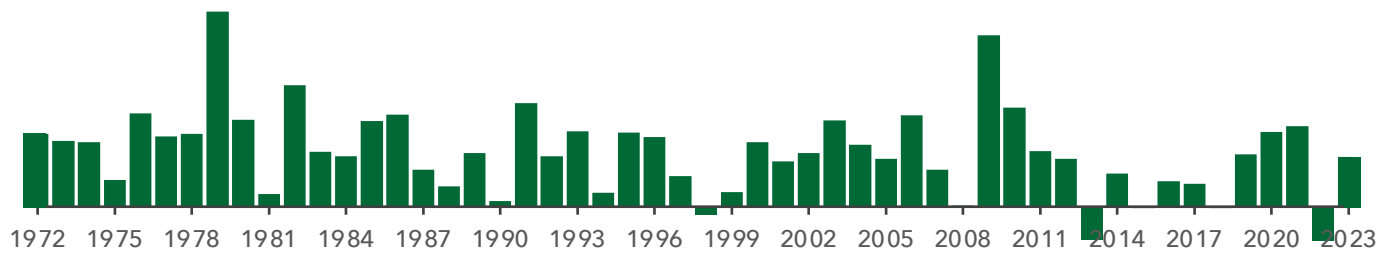

The Atlas Index uses advanced AI/ML and data processing tools to track and measure the price performance and volatility of liquid, stable, and negatively correlated legacy assets that have formed the foundation of the US Dollar (Gold, Real Estate/REITs, US Treasuries). Atlas offers an investment strategy focused on integrating tangible, regulated safe haven assets with TradFi and DeFi products, enabling scalable distribution, adoption and seamless integration to provide a more stable complementary hedge to US dollar instruments.

**Our ACT Token offers a higher performing, more stable alternative**

The global macro-economic environment faces significant, intensifying risks in the shape of economic, political and environmental degradation - prompting investors to seek ways to protect and grow their assets in the face of an uncertain future.

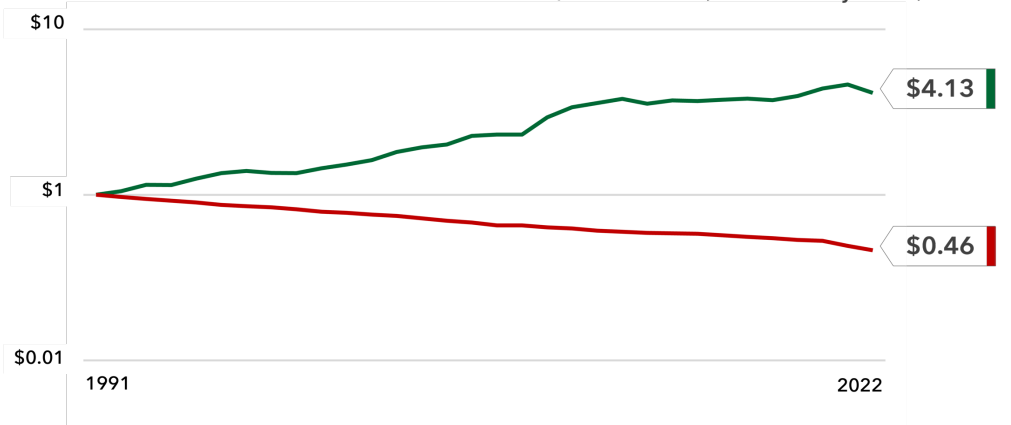

### Back tested to 1972, ACT is a safer and stronger currency

Positive performance in 49/52 years, with 8.2% avg returns & 6.7% avg volatility

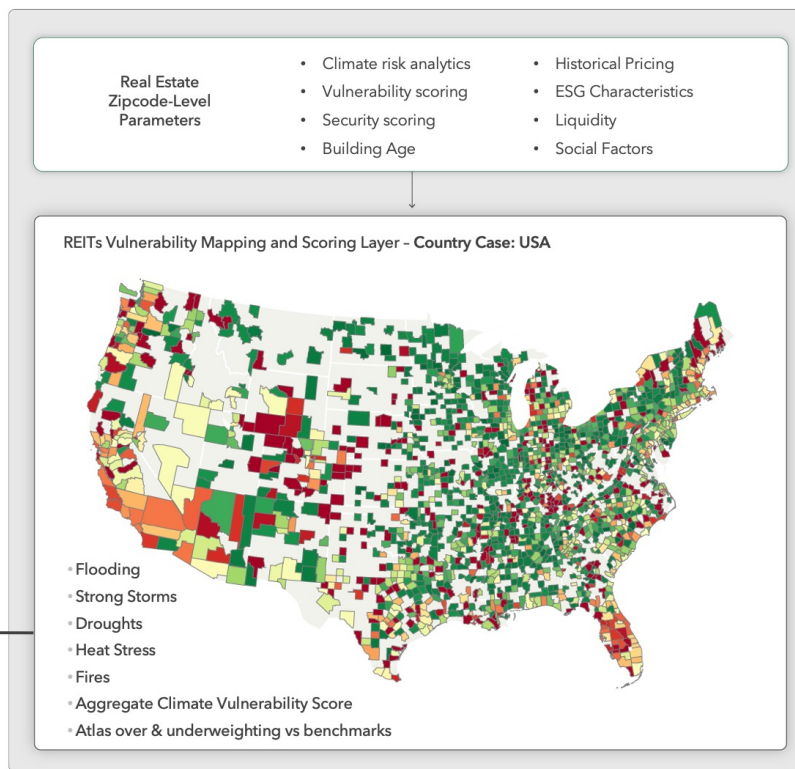

### Atlas Performance vs the US Dollar

Value of Atlas Portfolio vs the US Dollar, since 1991 (inflation adjusted)

**Atlas Portfolio has quadrupled its value in the last three decades, while the dollar has halved**

The Atlas Index is a thematic investment strategy to accelerate the global transition to a net zero economy by investing in treasuries, gold, food & water, resilient real estate and sustainable communities that have been the foundation of economic stability for centuries. The **ACT Basket** reflects the Atlas belief that traditional real assets can be new and innovative, and need to be delivered in a manner that keeps pace with changing investor needs in volatile markets.

Atlas is building an institutional-grade stablecoin with inflation resilient attributes, backed by real world assets

## Time to ACT

We believe fintech innovation holds the most solutions for mobilizing capital at scale - for wealth preservation, climate adaptation and fostering resilient, prosperous communities. Supported and distributed through top-tier financial and technology partners, Atlas presents an exciting opportunity for socially responsible investing, attracting partners who seek to make a positive impact on the world. The Atlas ACT is designed for large scale adoption aiming to mobilize private capital in funding climate adaptation and sustainability and become a leading, regulated digital token backed by real assets. Join us in re-imagining financial resiliency and asset safety. Together, we can build a more stable and sustainable financial future for global communities.
